

LM300E high speed grout mixer

► Description:

LM300E high speed grout mixer is a high speed high shear colloidal grout mixer. LM300E high shear grout mixer has been designed for use either in conjunction with a conventional paddle mixer and pump or, by virtue of its own built in impeller pump, as a stand-alone mix and place machine. The colloidal grout mixer will rapidly and efficiently mix various types of grout which can include cement, bentonite and sand. It is specially design for cement mixing and grouting in ground/underground engineering. We also can design the mixer with agitator, to make the mixing work can continuously be done.

► Application:

LM300E high speed grout mixer has been designed for use either in conjunction with a conventional paddle mixer and pump or, by virtue of its own built in impeller pump, as a stand-alone mix and place machine.

► Features:

The LM300E high speed grout mixer will rapidly and efficiently mix various types of grout which can include cement, bentonite and sand. It is specially design for cement mixing and grouting in ground/underground engineering. We also can design the mixer with agitator, to make the mixing work can continuously be done.

Technical data:

Model	LM300E
Capacity	300L
Output	1000L/min (Metered by water)
Impeller speed	1450rpm
Power	7.5KW
Voltage	3 phase, 380V, 50HZ
Dimension	1250*1050*1800mm
Weight	280kg
