

## LH76-915B TBM Used Peristaltic Hose Pump

### ► Description:

LH76-915B industrial hose pump (squeeze pump) consists mainly of pump house, rotor, roller, idle roller, squeeze tube and driving unit. The squeeze hose is U-shape in pump house, when rotor drives roller to rotate, hose is deformed. After the roller rotate, the deformed hose recover by its elasticity.

Thus the negative pressure in this hose is generated, sucking slurries, and discharging through outlet under roller's push, finally forms pressure conveying of slurries.

### ► Application:

Thus the negative pressure in this hose is generated, sucking slurries, and discharging through outlet under roller's push, finally forms pressure conveying of slurries.

---

## ► Features:

No valves

Self-priming

Only tube to replace

Dry-running without damage

Reversible

No contact between product and mechanical parts

Able to pump products with solid parts inside

Easy maintenance, low-cost, short down time

## ► Technical Data:

Type	LH76-915B
Max. output	20M <sup>3</sup> /h
Rotation	40RPM
Squeeze hose ID	76mm
Max. pressure	1.0Mpa
Voltage	3 phase, 380V, 50HZ
Power	18.5KW
