

Electric Hydraulic Oil Pump for Tensioning Jack

Describe

This electric hydraulic oil pump for tensioning jack is a complete hydraulic power pack, it is made of oil pump, control valve, oil box, motor, oil gauge and etc. Compact structure, powerful function, small size, light weight, and convenient use High working pressure.

Features

- 1) Electric hydraulic oil pump is a small dimension, lightweight, convenient usage, high working pressure.
- 2) Holding function: at the condition that outer oil-way is no reveal, stop the pump for holding 5 minters, rated pressure reduce less than 5Mpa.
- 3) Pump station: high-low pressure pump supply oil at the same time when low pressure, it can get the large output flow; low pressure pump automatically unloading back the oil via control valve when high pressure, it can reduce the consumption of the electric motor.

Application

1. Electric hydraulic oil pump can be installed into some machine for supplying power pack.
2. As a test pressure pump station for kinds of high pressure hydraulic components, high pressure container, high pressure rubber hose.
3. Electric hydraulic oil pump for tensioning jack is matched with other hydraulic tools, it can supply driven for lifting, profiling, bending pipe, straightening, tearing down, cutting,

installing, gauging pipe, punching and etc.

Technology data

Model	Working Pressure Mpa	Low pressure Mpa	High pressure flow L/min	Low pressure flow L/min	Power Kw	Voltage V	Oil capacity L
ZB-0.55	63	2	0.4	1	0.55	380/220	7
ZB-0.75	63	2	0.7	2.4	0.75	380/220	16
